

## The beat SHD product family

### The high-performance Behind-The-Ear hearing systems with SHD technology

Everyone's needs and desires are different. HANSATON has a wide range of Behind-The-Ear hearing systems available to help you and your hearing system professional find an optimal solution. Dynamic and powerful, the high-performance beat SHD family of products provides impressive amplification without sacrificing sound or speech quality.

#### beat SHD RS13

The hearing system has been developed for moderate to significant hearing loss. The modern designer housing features an easy-to-open battery compartment and an easy-to-find button.

#### beat SHD RS675

Because of its performance strength, the beat SHD RS675 makes it possible to care for customers with severe hearing loss.

beat SHD provides optimal and secure support, especially for users with significant hearing loss. This is pure power, and thanks to precise speech, localization and optimization functions, this small dynamo also supports a comfortable personal and spatial hearing experience.

Choose from six attractive color combinations.

beat SHD  
Power for your hearing intelligence

HEAR Intelligence™

Thanks  
to the powerful  
Behind-The-Ear  
hearing systems, there  
is confidence  
throughout the day

# Power for your hearing intelligence

## Power for your hearing intelligence Thanks to impressively strong chip technology

The beat SHD product family is part of HANSATON's HearIntelligence™ hearing systems, which were developed to take over impaired natural hearing processes using innovative signal processing. Their objective is not only to balance hearing loss, but also to allow for a more natural hearing experience with hearing systems. Experience for yourself how innovative technology can have powerful effects.
