

*Did you know...?*

In-the-ear (ITE) hearing systems are manufactured based on an individual mold of the user's ear. We use state-of-the-art laser technology to create a hearing system that fits your ear perfectly. ITE hearing systems and their microphones sit inside the ear canal. This means that the individual shape of the user's ear helps shape the sound as it is picked up.

**DESIGN  
HEARING SYSTEM****CONVENIENT, DISCREET  
AND BEAUTIFUL**

## Better hearing.

### *Understand better, live better.*

HANSATON firmly believes: Better hearing and understanding give many people the opportunity to live a better life. For more than 60 years, we have delighted our customers with innovative concepts and pioneering hearing systems. We take cutting-edge technological and audiological visions and make them reality.

To get the most out of your hearing system, it is also very important that you work together with your hearing systems specialist, who can draw upon a wealth of experience and knowledge to answer all of your questions, and to assist you in selecting and individually adjusting your hearing system.

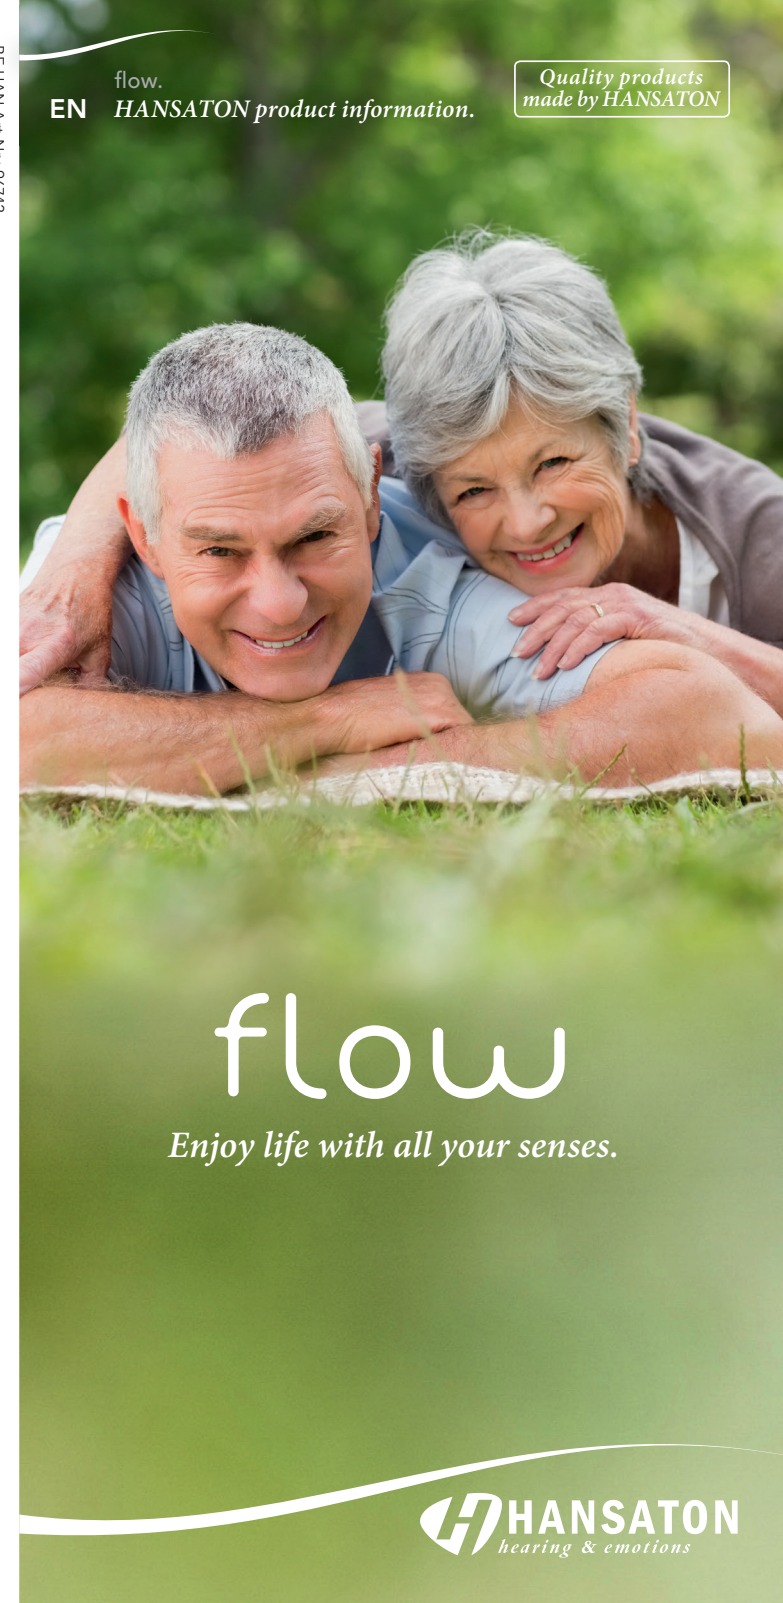

Your hearing systems specialist is looking forward to your visit:
