

With HearIntelligence™.

Awaken your natural hearing intelligence.

When hearing, the ears and the brain simultaneously undergo various complex, intelligent processes: For example, they detect acoustic signals, determine the signals' spatial locations, and evaluate their importance. At HANSATON, we speak of natural hearing intelligence. This refers to the complex interplay of different functions that are so individually and perfectly coordinated that they happen completely unconsciously. But if the ears no longer function properly, then the brain cannot perform its tasks any longer either. That is why we here at HANSATON demand the exact same requirements from a hearing system that a healthy ear would require.

HearIntelligence™ hearing systems from HANSATON have been developed with the aim of taking over the impaired, natural processes of hearing through innovative signal processing. The goal is not only to compensate for the hearing loss, but also to allow for a more natural hearing

You can find out more about the HANSATON hearing instruments from your local hearing professionals or on the Internet at www.hansaton.com

HEAR Intelligence

powered by HANSATON

**Spatial hearing
in a new dimension.**
Awaken your natural
hearing intelligence with
BTE hearing systems.

jam SHD
Behind-the-ear hearing systems.

Go about your day without worrying. With hearing systems that adjust to your life.

Sometimes we take the simple things in life for granted... until they no longer fully function, and then we realize how important they really are. Hearing is one such example. Hearing loss makes natural acoustic perception – and thus everyday life – more difficult.

Shape your life the way you want it to be – the newest jam SHD HANSATON hearing systems with innovative SphereHD Technology provide cutting-edge spatial acoustics, so you can experience natural hearing in all kinds of life situations.

100 % ease of use. Statistically proven: in one HANSATON study, 94% of participants indicated that they could feel the battery door immediately, and 100% found it easier to open than battery doors on previous models

jam SHD S312. Wearing comfort at the highest level.

The jam SHD S312 is as smart as it is comfortable. With its perfected, unique housing, optimized mini-tubing and all new, innovatively designed battery compartment for particularly easy opening, this little miracle provides maximum comfort in everyday situations.

Its small, ergonomically shaped housing ensures that the jam SHD S312 is particularly comfortable to wear, and the soft, transparent tube fits so perfectly to the ear that it is scarcely noticeable from the outside. The hearing system thus integrates both optically and acoustically into the life of the hearing system user.

With its highspeed detection, optimal signal processing, and the innovative SphereSound SHD algorithm, HANSATON has created a new dimension of spatial and natural hearing.

Rich color palette guaranteed: The jam SHD S312 features the modern HANSATON logo and is also available in the elegant special Black Edition color.
